

What being green tells your clients about you:

- You design homes that are as healthy, energy-efficient and durable as they are beautiful.
- You provide creative alternatives to lower their utility bills and carbon footprint, and make their homes healthier and more comfortable places to live.
- You know how to apply green building principles to reduce allergens, mold and mildew in their homes.
- You are dedicated to high quality, sustainable designs.
- You are a professional who pays attention to the latest, most state-of-the-art advancements in your field.
- You know that green homes — especially those with certifications like LEED, EarthCraft and EnergyStar — enjoy higher resale value and overall appeal.
- You understand the kind of environmentally conscious features they want in their homes.
- You care about the environment as much as they do.
- Your homes really are superior.

“While working with Southface Energy Institute to develop the EarthCraft House Renovation program, I developed a deep commitment to green building and remodeling. Since then, I have made it my personal commitment to be a good steward of the environment by assisting others in making their homes and projects healthy, efficient and durable. Through my personal experience of living in an EarthCraft House, I have become acutely aware of the increased comfort, health and cleanliness that these building techniques provide. There is no downside to building green.”

Carl Seville, Seville Consulting

Green From the Ground Up: How to add sustainability and value to your vision.

Carl Seville, green building consultant and owner of Seville Consulting, has been working with architects, builders, remodelers and designers for over 30 years.

He founded and owned one of Atlanta's most respected remodeling firms, SawHorse, Inc., for 25 years. In 2001, he changed directions and began applying his passion for sustainability towards helping others design and build better, healthier, more durable buildings.

Since then, Seville has earned a reputation as one of the nation's top green building consultants, trainers and speakers.

Team up with Seville Consulting

We offer training for your entire firm, or work with you on a per-project basis to help you incorporate the most up-to-date green design principles into your buildings.

Bringing in the sustainable perspective at the schematic stage will allow you to make your projects truly "Green From the Ground Up". With Seville Consulting as part of your team from the beginning, you can improve **building performance** (energy efficiency), **indoor air quality** (IAQ), **durability** and **resource efficiency** while maintaining your unique style and vision.

Your clients will appreciate the added value your designs provide by offering them a healthier, more sustainable home that's also an excellent return on their investment. *It's time to go green!*

Carl Seville,
Seville Consulting

"Carl Seville is one of the most dedicated people out there in the advancement of green building. As a consultant, he is passionate in his approach to building science. I would recommend him if you need help from a green building consultant — but only if you want the best!"

Matt Hoots
President, The Hoots Group
Inc
